Professional Summary

Computer Science undergraduate with hands-on experience delivering production-grade web applications using Next.js, React, TypeScript, Node.js, and MongoDB. Built healthcare platforms, multilingual business websites, real-time communication systems, and SaaS products with a focus on scalable architecture, modern frontend engineering, RBAC, and internationalization.

Education

Bachelor of Technology (Computer Science Engineering)
Shridhar University, Rajasthan

Aug 2023 – Present

Technical Skills

Tech Stack: JavaScript, TypeScript, Python, SQL, React.js, Next.js, Tailwind CSS, Shadcn UI, Node.js, Express.js, MongoDB, PostgreSQL, REST APIs, AWS S3, GitHub, Postman, Cloudinary

Core Concepts: Authentication, RBAC, Multi-Tenant SaaS, Internationalization (i18n), RTL Support, Admin Dashboards

Experience

Full Stack Developer (Contract-Based)

Jan 2025 – Dec 2025

Viacam Productions

- Delivered **6+** production-ready websites across healthcare, manufacturing, and hospitality domains.
- Built admin dashboards with **CRUD workflows**, **RBAC**, **multilingual** support, and **RTL** Arabic localization.
- Developed secure TypeScript-based forms using React Hook Form, Zod, MongoDB, and Mongoose.
- Integrated WhatsApp APIs, Formspree, and automation workflows while serving as the primary technology contributor.

Web Development Intern

Jul 2024 – Oct 2024

Heega Sports

- Improved UI responsiveness and contributed to the company's eCommerce platform.
- Built internal **analytics** and **monitoring tools** using Python for operational visibility.
- Gained hands-on exposure to **Arduino-based IoT** systems and reporting workflows.

Selected Projects

MedFlow — Multi-Tenant Healthcare SaaS Platform

Next.js, TypeScript, MongoDB, PostgreSQL, RBAC

- Building a multi-tenant healthcare SaaS platform with appointments, billing, pharmacy, radiology, subscriptions, audit logs, and tenant-aware RBAC.

VoltMeet — Real-Time Video Communication Platform — View Live

Next.js, TypeScript, Stream.io, MongoDB

- Built a video conferencing platform supporting scheduling, recordings, participant invitations, device switching, group calls, and real-time communication.

Synergy Cancer Platform — View Live

Next.js, MongoDB, WhatsApp API

- Developed a healthcare appointment platform featuring localization, admin dashboards, and WhatsApp-based notification workflows.
